

This is the main idea:

- Offering a way for retail SMEs in Kenya to sell more.
- These are the main gaps to fill:
 1. Offering a way to retain customers.
 2. A way to follow-up on enquiries and people who bought.
 3. A way of rewarding loyalty.
 4. Giving common sales best practices such as how to do proper follow ups.
 5. Get feedback from customers.

The goal is to empower SME retail businesses in Kenya to sell more and hence grow.

This document assumes marketing has already been handled by the business.

The business has either walk-in clients or those gotten from social media.

The tool is to help businesses handle those who buy or are interested in buying later.

For those who buy, how do we retain and for those who want to buy later, how do we follow-up.
